

Kongress 2023

Abstract

What is AI in medicine: a fancy toy, a killer monster, or a wise friend?

- Dr. Narges Ahmidi

The answer lies in understanding the essence of AI before forming a judgment. Dr. Ahmidi's presentation offers a glimpse into the diverse range of approaches within medical AI. What is the current position of the medical industry? How is medical technology progressing? Dr. Ahmidi will showcase the potential of utilizing existing clinical data to benefit both patients and healthcare providers. She will delve into the existing applications of AI in healthcare and discuss their practical implications. Ultimately, she will address the question of where AI is most suitable or less appropriate in real-world scenarios.
